

Application #0019

AMT-N6442 15.1" TFT LCD Panel Mount VGA Monitor

The Product

The AMT-N6442 is a 15.1" panel mount monitor, with VGA input and 240 volt power supply. The display has the Philips LG 15.1" LM151X05 display, which is the latest panel from LG Philips, and has excellent colour, contrast ratio, brightness and viewing angle characteristics.

The Application

This monitor was integrated into a weighing system for the Pharmaceutical industry. A well known Australian Manufacturer purchased this product and mounted the unit into the wall in order to display the statistics on the weights of the batches of each drug being applied to the drugs produced.

The system allowed the manufacturer to track the various quantities used of each drug and applied to each batch, a function necessary for their quality assurance.

Features

- Ex-stock: display supplied within 1 –2 weeks
- Standard Amtex design with spare parts available
- Full 12 month warranty on all parts
- Able to be recessed into the wall (about 60mm deep).
- Built and supported in Australia by AVisum Pty Ltd
