

Application #030

AMT-N6643 10.4" Pal Monitors for Security Cabin

The Product

The AMT-N6643 is a 10.4" PAL monitor used for a security system. The units consist of the MAV-1280 PAL input card which accepts a PAL component video signal (from the cameras); and digitally drives the LG Philips 10.4" TFT LCD Panel.

An OSD (on screen display) switch is provided at the rear of the screen for brightness, contrast adjustment.

There is only 2 connections on the units as required; the 240V ac IEC plug to power the onboard 30 watt power supply, and the PAL composite video input RCA female connector to accept the video.

The bezel at the front is acrylic and has a 3mm clear antiglare filter to protect the LCD screen.

The Application

We provided 12 of these displays which were mounted into a security cabin for the purpose of keeping guard aof some government premises.

The displays were panel mounted into cabinets, with each screen displaying the images from cameras watching over the areas.
