- **Keyboard rated IP67, 50mm Trackball rated IP65**

Dim: 475 x 215 x 57mm

Dim: 432 x 152 x 40mm

General Description

Based on the standard 105 short travel keyboard, this unit combines all functions, controls and features for comfortable key input and cursor control under low light conditions, as well as under normal daylight. This sealed industrial keyboard integrates a 50mm trackball.

The key legends, key edges and the trackball contour are backlit for ease of use under low light conditions. The backlight is digitally dimmable at 8 distinctive levels by pressing one defined key. An automatic night/day sensor controls the on/off setting of the backlight and the luminosity of the "numlock" and "capslock" LED's.
